

Subjects Index

A

- Acute myocardial infarction, 6, 33.
— scrotum, 207.
- Adenoma, ectopic, 69.
- Aerosol penetration and inhaled bronchodilators effects, 168.
- AIDS, 245.
- Ambulatory radionuclide ventriculography, 198.
- Amino-acids labelling in PET, 150.
- Amino-dextran-deferoxamine, 97.
- Angina-like chest pain, 53.
- Angiocardigraphy in transesophageal left atrium pacing, 168.
- Anti-HPLAP monoclonal antibody and bromine-77, 155.
- Anti-tumor compounds studies and ⁵⁷Ni-deoxyrubicin, 180.
- Antibodies and oligosaccharide chains, 162.
— anti-melanoma monoclonal, 97, 191.
- Antibody labelling with ^{99m}Tc, 137.
- Arterial blood flow and ¹⁹¹Ir generator, 170.
— — and ¹⁹¹O₈ generator, 170.
- Attenuation, 26.
- Automatic definition of ROIs, 213.
- Autoradiographic localization with ¹²⁵I-NCQ298, 172.
- Avidin-biotin, 228.

B

- Benzodiazepine agonists and GABA concentration, 154.
- Biodistribution and ¹²³IMAO-B inhibitor, 153.
— in gamma-scintigraphy, 143.
— study and oxamniquine, 176.
- Biological properties of ^{99m}TcN(L)₂, 161.
- Blood flow in experimental rat tumors, 154.
- Bone marrow ablation and ¹⁶⁶Ho-DOTMP, 155.
- metastases, 57.
— — and ¹⁵³Sm-EDTNP, 165.
— pain and ^{117m}Sn, 178.
— scintigraphy, 57.
— — in neuroblastoma, 107.

- Bone SPECT processing, 49.
- Brain and IMAO B kinetics, 159.
- Breast neoplasms, 57.
- ⁷⁶Br-FLB 457 in vivo study, 156.
- ⁷⁶Br-metabromobenzylguanidine and heart adrenergic reuptake, 156.
- [⁷⁶Br]5,7-dibromo-4-oxo-1,4-dihydroquinoline-2-carboxylic acid in PET studies, 167.
- Bromine-77 and anti-HPLAP monoclonal antibody, 155.
- Bromoperoxidase and F(ab)₂ fragment, 155.

C

- CA 15-3 in metastatic breast cancer, 126.
- CA 549 in metastatic breast cancer, 126.
- Caesium in pregnant Guinea pig and placental transfer, 175.
- Cancer diagnosis and treatment, medium half-life positron emitters, 149.
— — and therapy and ⁶⁷Ga, 177.
— — — and ⁹⁰Yt, 177.
- Captopril renal scintigraphy, 249, 259.
- Carbon-11 and PET, 150.
- CEA in metastatic breast cancer, 126.
- Circumferential profile analysis, 185.
- Colon cancer and 5-[¹²³I]iodo-2'-deoxyuridine intra-arterial infusion 157.
- Colon scintigraphy, 218.
- Constipation, 218.
- Coronary artery disease, 198, 233.
- Creatine kinase, 83.
- Cu-PTSM and tissue blood flow estimation, 163.
- Cultured astrocytes and IMAO B kinetics, 159.

D

- Diastolic relaxation in myocardial stunning, 119.
- Dipyridamole test, 185.
- DMSA and global cortical tubular, 165.
- Dopamine D₂ receptors in PET studies, 156.
— reuptake and SPECT, 153.
- Dopaminergic radioligands and endogenous dopamine concentration, 174.

E

- Endogenous dopamine concentrations and D₂ dopaminergic radioligands, 174.
- Equilibrium gated radionuclide angiocardigraphy, 185.
— — — angiography, 6.
- Esophageal motility, 53.
- Experimental abscesses and ^{99m}Tc low-molecular weight complexes, 169.
— animal models in arterial blood flow, 170.
— rat tumors and blood flow, 154.
— — — and iodo-methyl-tyrosine, 154.
— — — and tyrosine, 154.
— — — and tumor growth, 154.

F

- F(ab)₂ fragment and bromoperoxidase, 155.
- Fast Fourier transform, 223.
- ¹⁸F-FDG in SPECT studies, 158.
- Fluorine-18 and PET, 150.
- 4-(5-fluoro-2-hydroxyphenyl)-(4-[¹¹C]methoxyphenyl) and PET, 166.
- Fluoroimmunoassay, 83.
- Follow-up studies, 57.

G

- GABA concentration and benzodiazepine agonists, 154.
— receptor system with PET, 166.
— reuptake system in PET study, 179.
- ⁶⁷Ga-citrate scan, 245.
- Gallium-67 in cancer diagnosis and therapy, 177.
- Gamma scintigraphy, biodistribution, 143.
— — targeting, 143.
— spectrometry, 38.
- Gastric emptying measurements, 175.
- Gastroesophageal reflux, 53.
- Global cortical tubular and DMSA, 165.
- Glut proteins and 3-radioiodo-phloretin, 158.
- Graves' disease, 73.

H

Head cancer and ¹¹¹In-bleomycin, 154.
Heart adrenergic reuptake and ⁷⁶Br-metabromobenzylguanidine, 156.
¹⁶⁶Ho-DOTMP and bone marrow ablation, 155.
Hurtle cell tumor, 65.
Hyaluronan, 88.
Hyaluronectin, 88.
25-hydroxyvitamin D, 77.
Hypertension, 1.
Hypoactive lesion, 49.
Hypothyroidism, iatrogenic, 73.
Hypoxic tissue marked with sugar-coupled 2-nitroimidazoles, 158.

I

Iatrogenic alteration and ^{99m}Tc-methylene-diphosphonate-gentamicin, 180.
IMAO B kinetics in brain and cultured astrocytes, 159.
Immunoscintigraphy in pancreatic cancer with MoAb AR-3, 173.
— in ocular melanoma, 191.
— in lung cancer, 228.
¹¹¹In-bleomycin in head cancer, 154.
— in radiochemotherapy, 154.
¹¹¹In-DTPA, 218.
¹¹¹In-labelled anti-PAP MoAb and intraprostatic injections, 171.
— — — and intravenous injections, 171.
In vivo tumor detection with ^{99m}Tc-ADP, 171.
Inhaled bronchodilators effects on aerosol penetration, 168.
Interference by autoantibodies in immunoassays, 273.
Intra-arterial infusion with 5-[¹²³I]iodo-2'-deoxyuridine in colon cancer, 157.
— with 5-[¹²³I]iodo-2'-deoxyuridine in liver metastases, 157.
Intraprostatic injections and ¹¹¹In-labelled anti-PAP MoAb, 171.
Intravenous injections and ¹¹¹In-labelled anti-PAP MoAb, 171.
¹²³I MAO-B inhibitor and biodistribution, 153.
¹²³Iβ-CIT in SPECT studies, 153.
¹²⁵I-labelled meta-iodo-benzyl-guanidine pharmacokinetics, 172.
¹²⁵I-NCQ298 and dopamine D₂ and D₃ receptors in autoradiographic localization, 172.
¹³¹I-hyppuran in kidney transplantation, 115.
¹³¹I-radio-metabolic therapy, 69.
[¹²⁵I]IBZM, 18.
[¹²⁵I]PIT biodistribution and kinetics, 165.
Iodo-methyl-tyrosine in rat tumors, 154.
¹⁹¹Ir generator in arterial blood flow and experimental animal models, 170.
IRMA, 33.

K

Kidney transplantation, evaluation of function, 115.

L

Labelling antibodies with ^{99m}Tc, 170.
— in radioiodinated receptor tracers, 174.
— with medium position emitters, 141.
Left ventricular function, 6.
— — — and phosphocreatinine, 168.
Lipophilicity-activity in radioiodinated receptor tracers, 174.
Liver metastases and 5-[¹²³I]iodo-2'-deoxyuridine intra-arterial infusion, 157.
Lung cancer, 228.
Lung periphery and radioaerosol scintigraphy, 168.

M

Manual definition of ROIs, 213.
Mathematical models in nuclear medicine, 146.
Mean transit time, 218.
Measurement of gastric emptying, 175.
Medium half-life position emitters and cancer diagnosis, 149.
Melanoma, 18, 191.
Metabolism, 264.
Metaiodobenzylguanidine in neuroblastoma, 107.
Metastatic breast cancer and tumor-associated markers, 126.
Microautoradiography in histological studies, 159.
Monitoring of metastatic breast cancer, 126.
— of therapy for neuroblastoma, 107.
Monoclonal antibodies and radioimmunotherapy, 148.
— antibody, 21, 228.
— AR-3 immunoscintigraphy in pancreatic cancer, 173.
Murine and chimeric forms of ^{99m}Tc-labelled ¹⁷⁴H.64 MoAb, 158.
— mammary carcinoma and ^{99m}Tc B2C114, 167.
Mycobacterial infection, 245.
Myocardial infarct imaging with ^{99m}Tc-Antimyosin, 179.
— infarction, 83.
— ischemia, 213.
— perfusion, 233.
— stunning and radionuclide angiocardigraphy, 119.
Myoglobin, 83.
Myosin, 33, 83.

N

N-(4-[¹¹C]methoxyphenyl-4-phenyl-3-butenyl) 3-piperidine carboxylic acid in PET study, 179.
Neck cancer and ¹¹¹In-bleomycin, 154.
Nephropathy and ^{99m}Tc-phosphomycin in disodium maleate, 177.
Neuroblastoma and bone scintigraphy, 107.
Neuroreceptors and PET, 140.

Neuroreceptors and SPECT, 140.

⁵⁷Ni-deoxyrubicin in pharmacokinetics studies, 180.

NMDA receptor and [⁷⁶Br] 5,7-dibromo-4-oxo-1,4-dihydroquinoline-2-carboxylic acid, 167.

O

Oligosaccharide chains of antibodies, 162.
¹⁹¹O₂ generator in arterial blood flow and experimental animal models, 170.
Oxamniquine with ^{99m}Tc and biodistribution study, 176.

P

Palliation therapy for bone pain, 178.
Pentavalent-DMSA, 65.
Periodogram, 223.
Peristalsis, 223.
Pertechnetate, 12.
PET and carbon-11, 150.
— and fluorine-18, 149.
— and GABA receptor system, 166.
— and neuroreceptors, 140.
— studies and dopamine D₂ receptors, 156.
— study and GABA reuptake system, 179.
— study and N-(4-[¹¹C]methoxyphenyl-4-phenyl-3-butenyl) 3-piperidine carboxylic acid, 179.
Pharmacokinetics PET studies and [¹²⁵I]PIT, 165.
Pharmacokinetics of ¹²⁵I-labelled meta-iodobenzyl-guanidine, 172.
Phosphocreatinine on left ventricular function, 168.
Phospholipid ether, 264.
Placental transfer of radioiodine in pregnant Guinea pig, 175.
Polylysines labelling with ^{99m}Tc, 180.
Polymeric drug carriers in radiopharmacologic studies, 148.
Purity in radioiodinated receptor tracers, 174.
Pyelonephritis, 62.

R

Radiopharmacologic studies with polymeric drug carriers, 148.
Radioactivity measurement, 38.
Radioaerosol scintigraphy in lung periphery, 168.
Radioimmunoassay, 77.
Radioimmunoguided surgery, 21.
Radioimmunoscintigraphy, 191, 228.
Radioimmunotherapy with monoclonal antibodies, 148.
Radioiodinated receptor tracers and labelling, 174.

Radioiodinated receptors tracers and lipophilicity-activity, 174.
 — — — and purity, 174.
 3-radioiodo-phloretin and glut protein, 158.
 Radiolabelled drug targeting, 140.
 Radiolabelling methods and ^{57}Ni -deoxyrubicin, 180.
 Radiometal immunoconjugates and tumor imaging, 160.
 — — — and tumor therapy, 160.
 Radionuclide angiocardigraphy in myocardial stunning, 119.
 — esophageal transit test, 53.
 — ventriculography with $^{99\text{m}}\text{Tc}$, 180.
 Radiopharmaceutical regulatory programs, 147.
 Radiopharmaceuticals in therapy, 137.
 — complications, 139.
 Radiopharmaceutics EEC legislation, 147.
 — EFTA legislation, 147.
 Radiopharmacokinetics, methods, 137.
 Regional wall motion, 185.
 Regulatory programs in radiopharmacology, 147.
 Renal artery stenosis, 249, 259.
 — function agent in radiopharmacological evaluation, 162.
 — — and $^{99\text{m}}\text{Tc}$ -CAMI, 162.
 Renovascular hypertension, 249, 259.
 RIA, 33.
 ^{153}Sm -EDTMP and bone metastases, 165.

S

Scintigraphy, 18.
 Seasonal variations, 77.
 Silent ischemia, 198.
 Space-time matrix, 223.
 SPECT, 1, 26, 233.
 — and neuroreceptors, 140.
 — radiopharmaceuticals, developments, 141.
 — studies and ^{123}I -CIT, 153.
 — — with $^{18\text{F}}$ -FDG, 158.
 Spina bifida, 49.
 Streptokinase, 6.
 Strontium in pregnant Guinea pig and placental transfer, 175.
 Strontium-85, 38.
 Strontium-89, 38.
 $^{117\text{m}}\text{Sn}$ -DTPA and bone pain, 178.
 Subarachnoid hemorrhage, 33.

Sugar-coupled 2-nitroimidazoles as markers of hypoxic tissue, 158.
 Sulphur and nitrogen donor atoms, 144.
 Surgery, 73.
 Systolic function in myocardial stunning, 119.

T

^{201}Tl , 233.
 ^{201}Tl lung uptake, 213.
 Targeting in gamma-scintigraphy, 143.
 $^{99\text{m}}\text{Tc}$, 21.
 $^{99\text{m}}\text{Tc}$ and labelling antibodies, 170.
 $^{99\text{m}}\text{Tc}$ B2C114 and detection of murine mammary carcinoma, 167.
 $^{99\text{m}}\text{Tc}$ biguanide complexes, 175.
 $^{99\text{m}}\text{Tc}$ labelling of antibodies, 137.
 $^{99\text{m}}\text{Tc}$ low-molecular weight complexes and experimental abscesses, 169.
 $^{99\text{m}}\text{Tc}$ -1,2-diaminocyclohexane and biological evaluation, 179.
 $^{99\text{m}}\text{Tc}$ -ADP in in vivo tumor detection, 171.
 $^{99\text{m}}\text{Tc}$ -Antimyosin and myocardial infarct imaging, 179.
 $^{99\text{m}}\text{Tc}$ -CAMI and renal function, 162.
 $^{99\text{m}}\text{Tc}$ -cysteinyltriglycine and $^{99\text{m}}\text{Tc}$ -MAG3, 166.
 $^{99\text{m}}\text{Tc}$ -diphosphonate, 57.
 $^{99\text{m}}\text{Tc}$ -DMP-albumin and ventriculography, 161.
 $^{99\text{m}}\text{Tc}$ -DMSA, 62.
 $^{99\text{m}}\text{Tc}$ -DTPA in kidney transplantation, 115.
 $^{99\text{m}}\text{Tc}$ -etylenecysteine ethyl ester and $^{99\text{m}}\text{Tc}$ -LL-ECD, 178.
 $^{99\text{m}}\text{Tc}$ -F(ab')₂ antimeelanoma antibody, 191.
 $^{99\text{m}}\text{Tc}$ -HIG biology efficacy, 169.
 — radiochemical behaviour, 169.
 $^{99\text{m}}\text{Tc}$ -HM-PAO, 1.
 $^{99\text{m}}\text{Tc}$ -labelled ^{174}Hf .64 MoAb and murine and chimeric forms, 158.
 — tracer and tetraligands, 144.
 $^{99\text{m}}\text{Tc}$ -LL-ECD and $^{99\text{m}}\text{Tc}$ -etylenecysteine ethyl ester, 178.
 $^{99\text{m}}\text{Tc}$ -MAG3, 62.
 — and $^{99\text{m}}\text{Tc}$ -cysteinyltriglycine, 166.
 $^{99\text{m}}\text{Tc}$ -methylene-diphosphonate-gentamicin and iatrogenic alteration, 180.
 $^{99\text{m}}\text{Tc}$ -MIBI, 233.
 $^{99\text{m}}\text{Tc}$ -phosphomycin in disodium maleate and nephropathy, 177.
 $^{99\text{m}}\text{Tc}$ -RBC and ventriculography, 161.

$^{99\text{m}}\text{TcN}(\text{L})_2$ modifications and biological properties, 161.
 Testicular scintigraphy, 207.
 — torsion, 207.
 Tetraligands and $^{99\text{m}}\text{Tc}$ -labelled tracer, 144.
 Thyroglobulin assay, 273.
 — autoantibodies, 273.
 Thyroid cancer, 65.
 — disease, 12.
 — scan, 12.
 Thyrotoxicosis, 69.
 Tissue blood flow with Cu-PTSM, 163.
 TPA in metastatic breast cancer, 126.
 TPS in metastatic breast cancer, 126.
 Transchelation tumor of $^{99\text{m}}\text{Tc}$ and antibodies, 176.
 — — of $^{99\text{m}}\text{Tc}$ and cysteine, 176.
 Transesophageal left atrium pacing and angiocardigraphy, 168.
 TSH-receptor antibodies, 73.
 Tumor growth in experimental rat tumors, 154.
 — imaging, 88, 264.
 — — and radiometal immunoconjugates, 160.
 — localization, 264.
 — staging, 65.
 — therapy and radiometal immunoconjugates, 160.
 Tyrosine in rat tumors, 154.

U

Ureteral motility, 223.

V

Ventriculography and $^{99\text{m}}\text{Tc}$, 161.

X

X-ray in neuroblastoma, 107.

Y

Yttrium-90 in cancer diagnosis and therapy, 177.
